

MCP - Modernise Data Architecture and unlock intelligent workflows

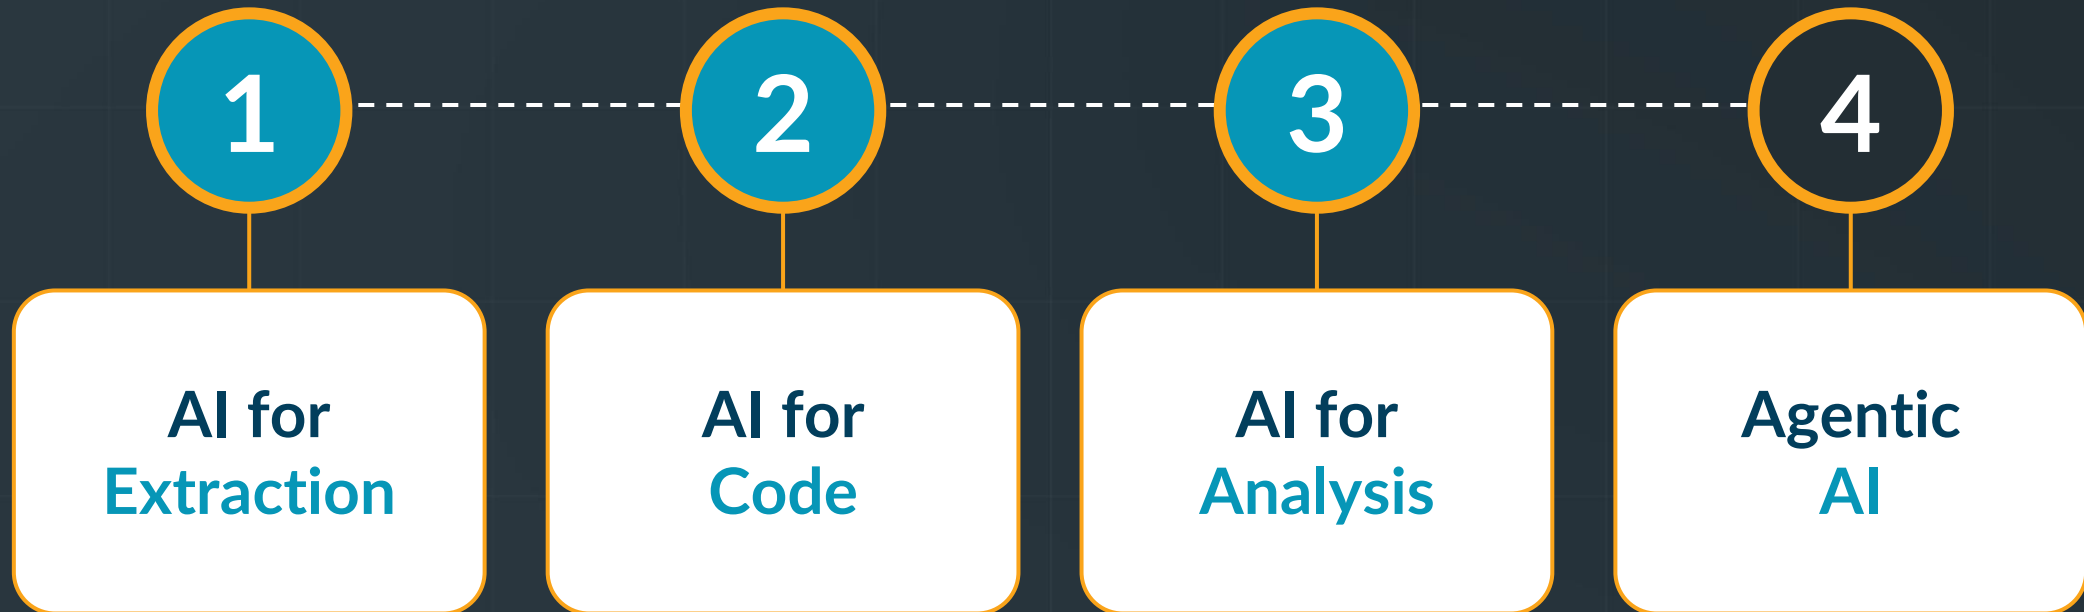

Ajay Kumar
Head of MCP Services

Our AI Journey

From early adopters to **AI native**

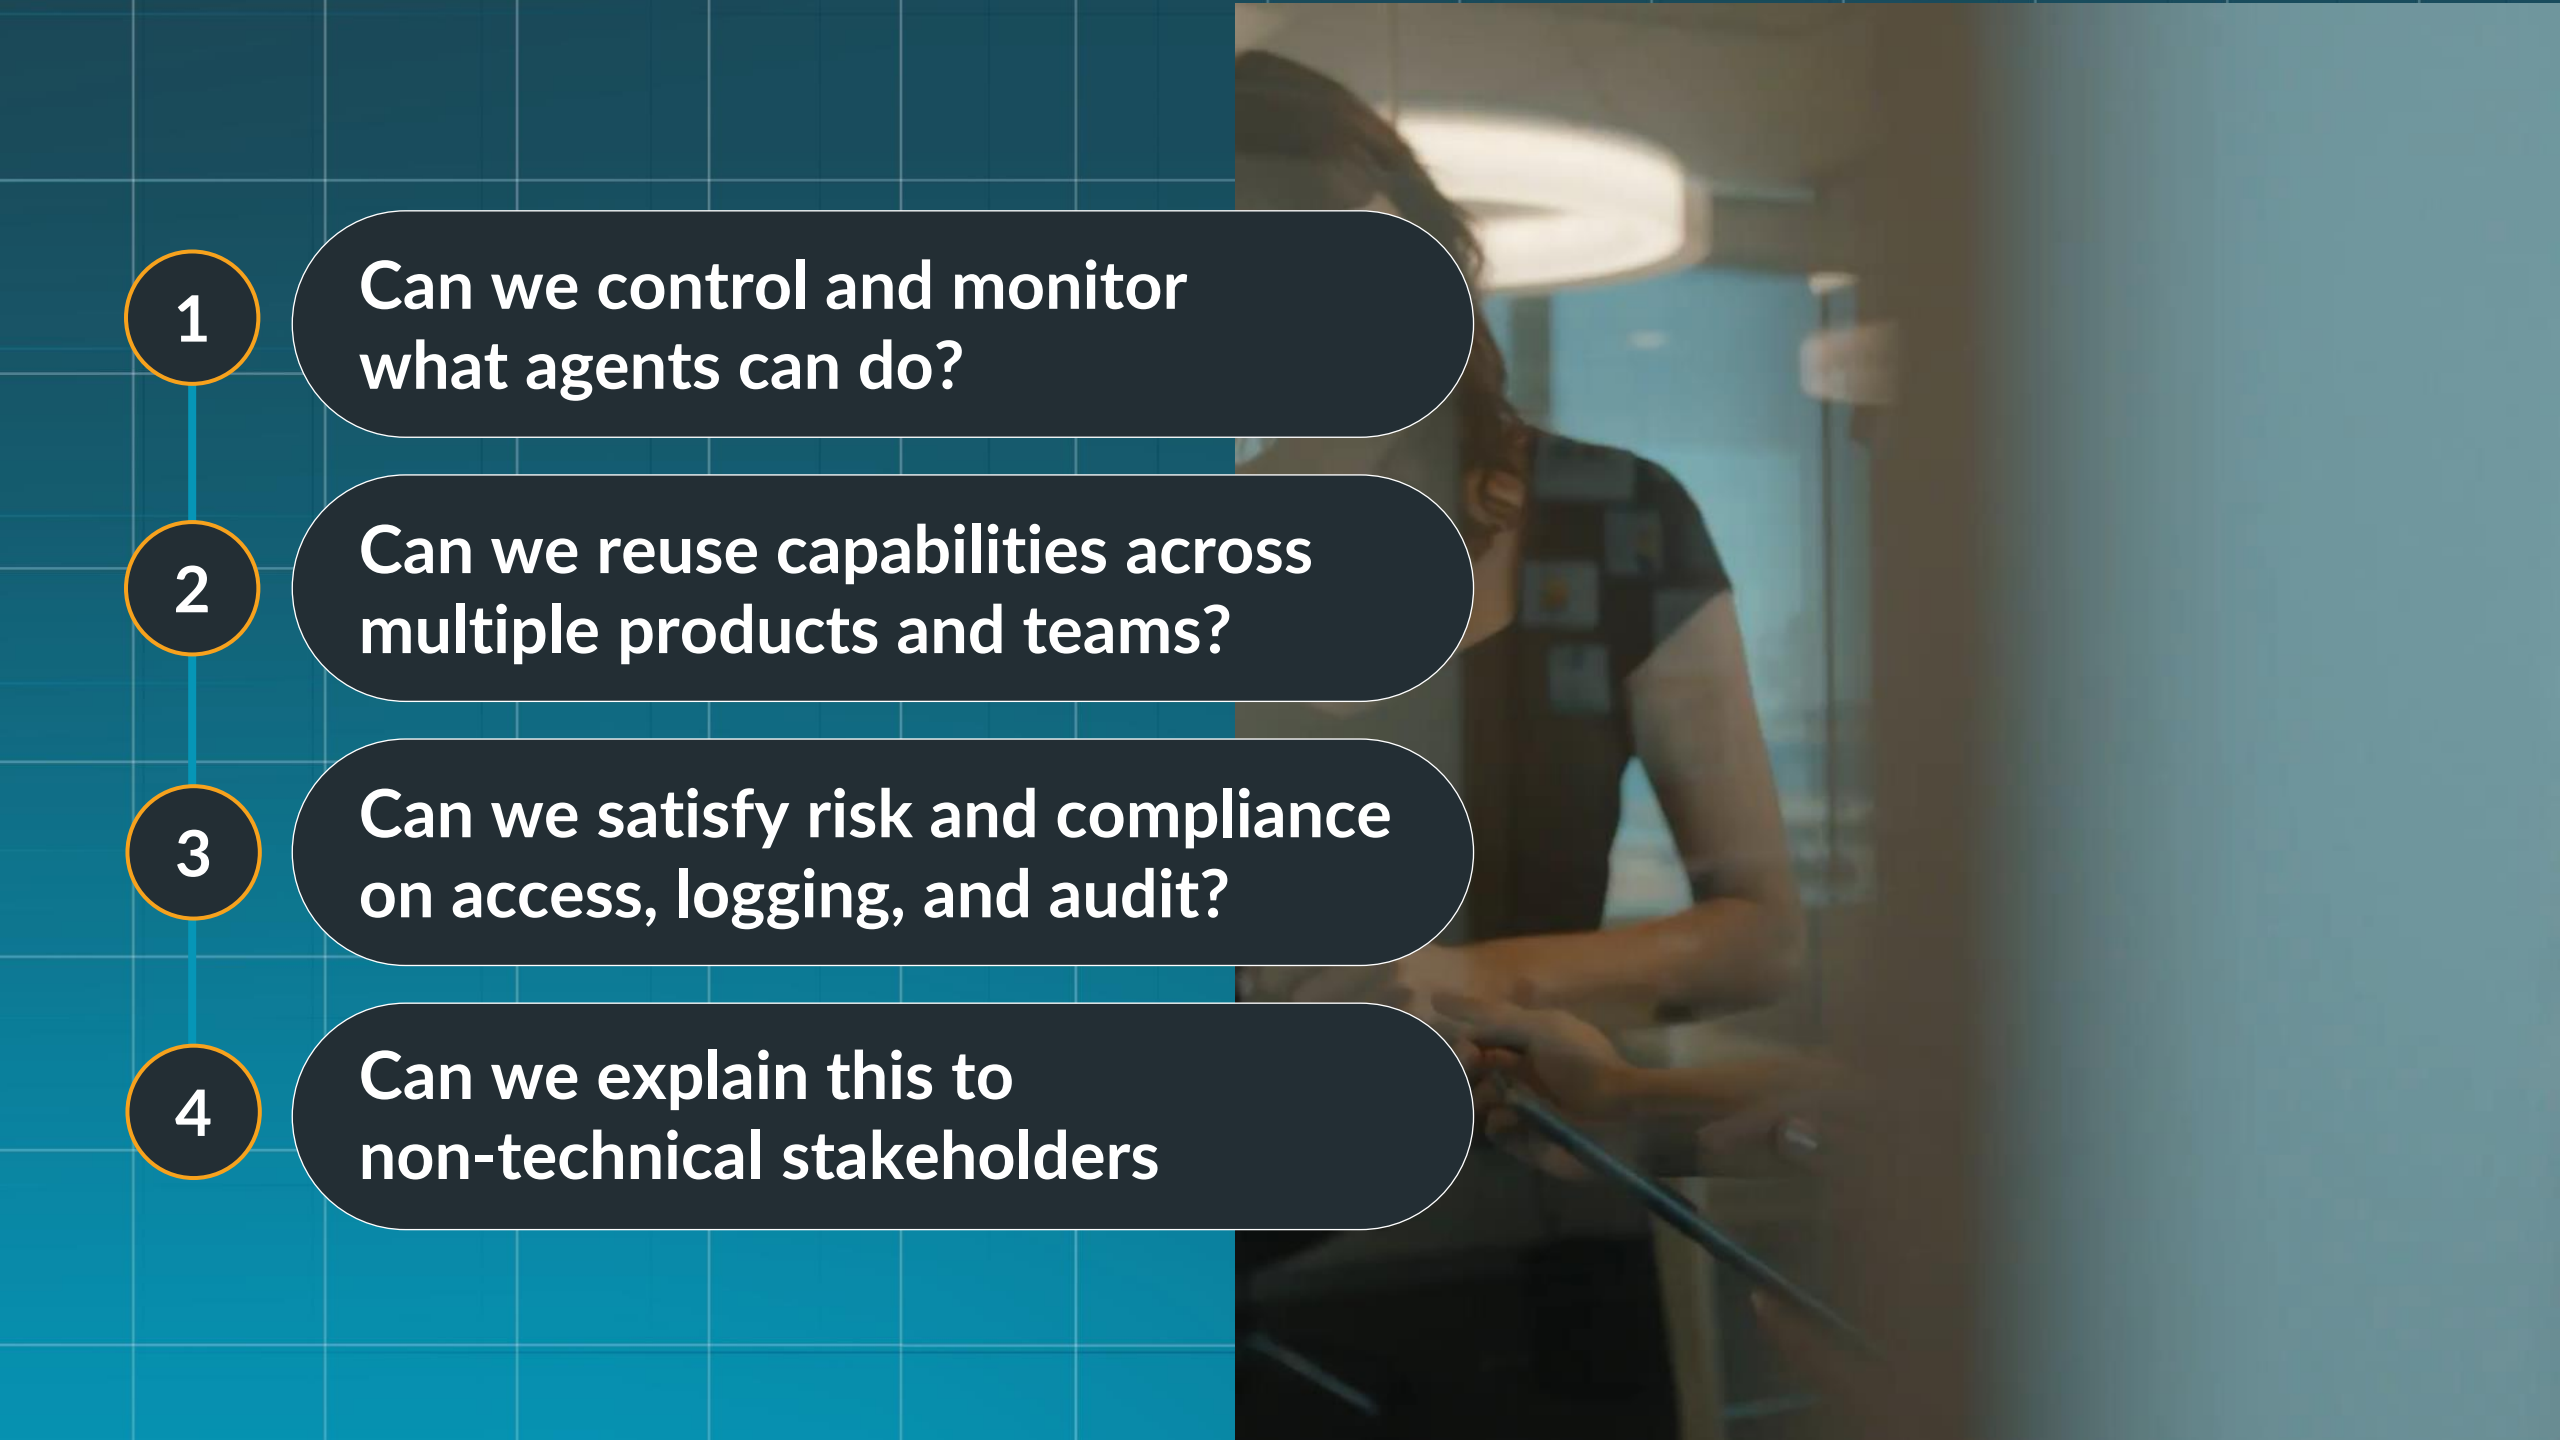

Tool access

Governance

Security

1

Can we control and monitor what agents can do?

2

Can we reuse capabilities across multiple products and teams?

3

Can we satisfy risk and compliance on access, logging, and audit?

4

Can we explain this to non-technical stakeholders

The Innovation Engine

A developer sandbox

Our MCP Gateway Server

A shared design pattern

Product Engine

Engine one

A dedicated MCP AI team
building the ambitious,
transformative solutions

Engine two

All other product teams
empowered to MCP-enable
their core products as part of
business as usual.

1

Start with trusted data, not models

2

Lean into industry standards

3

Make AI everyone's job

4

Design for agents like you design for users.

5

Resource it like you mean it.
